Dear CNC Participant,

We wanted to share an upcoming runway project that will close the Airport's east runway 24 hours a day, starting January 15, 2018 through February 19, 2018. **During this closure, arriving and departing aircraft will use the Airports west runway and/or Runway 10-28, the Airport's east-west runway.**

This particular runway closure involves repairing several sections of concrete runway surface. In addition, we will use the time to remove and replace painted markings on the east runway, as well as complete required rubber removal work.

For those who may be less familiar with the Airport's runways and runway designations, the diagram below reflects the closed runway in red, with the two active runways during this closure shown in green.

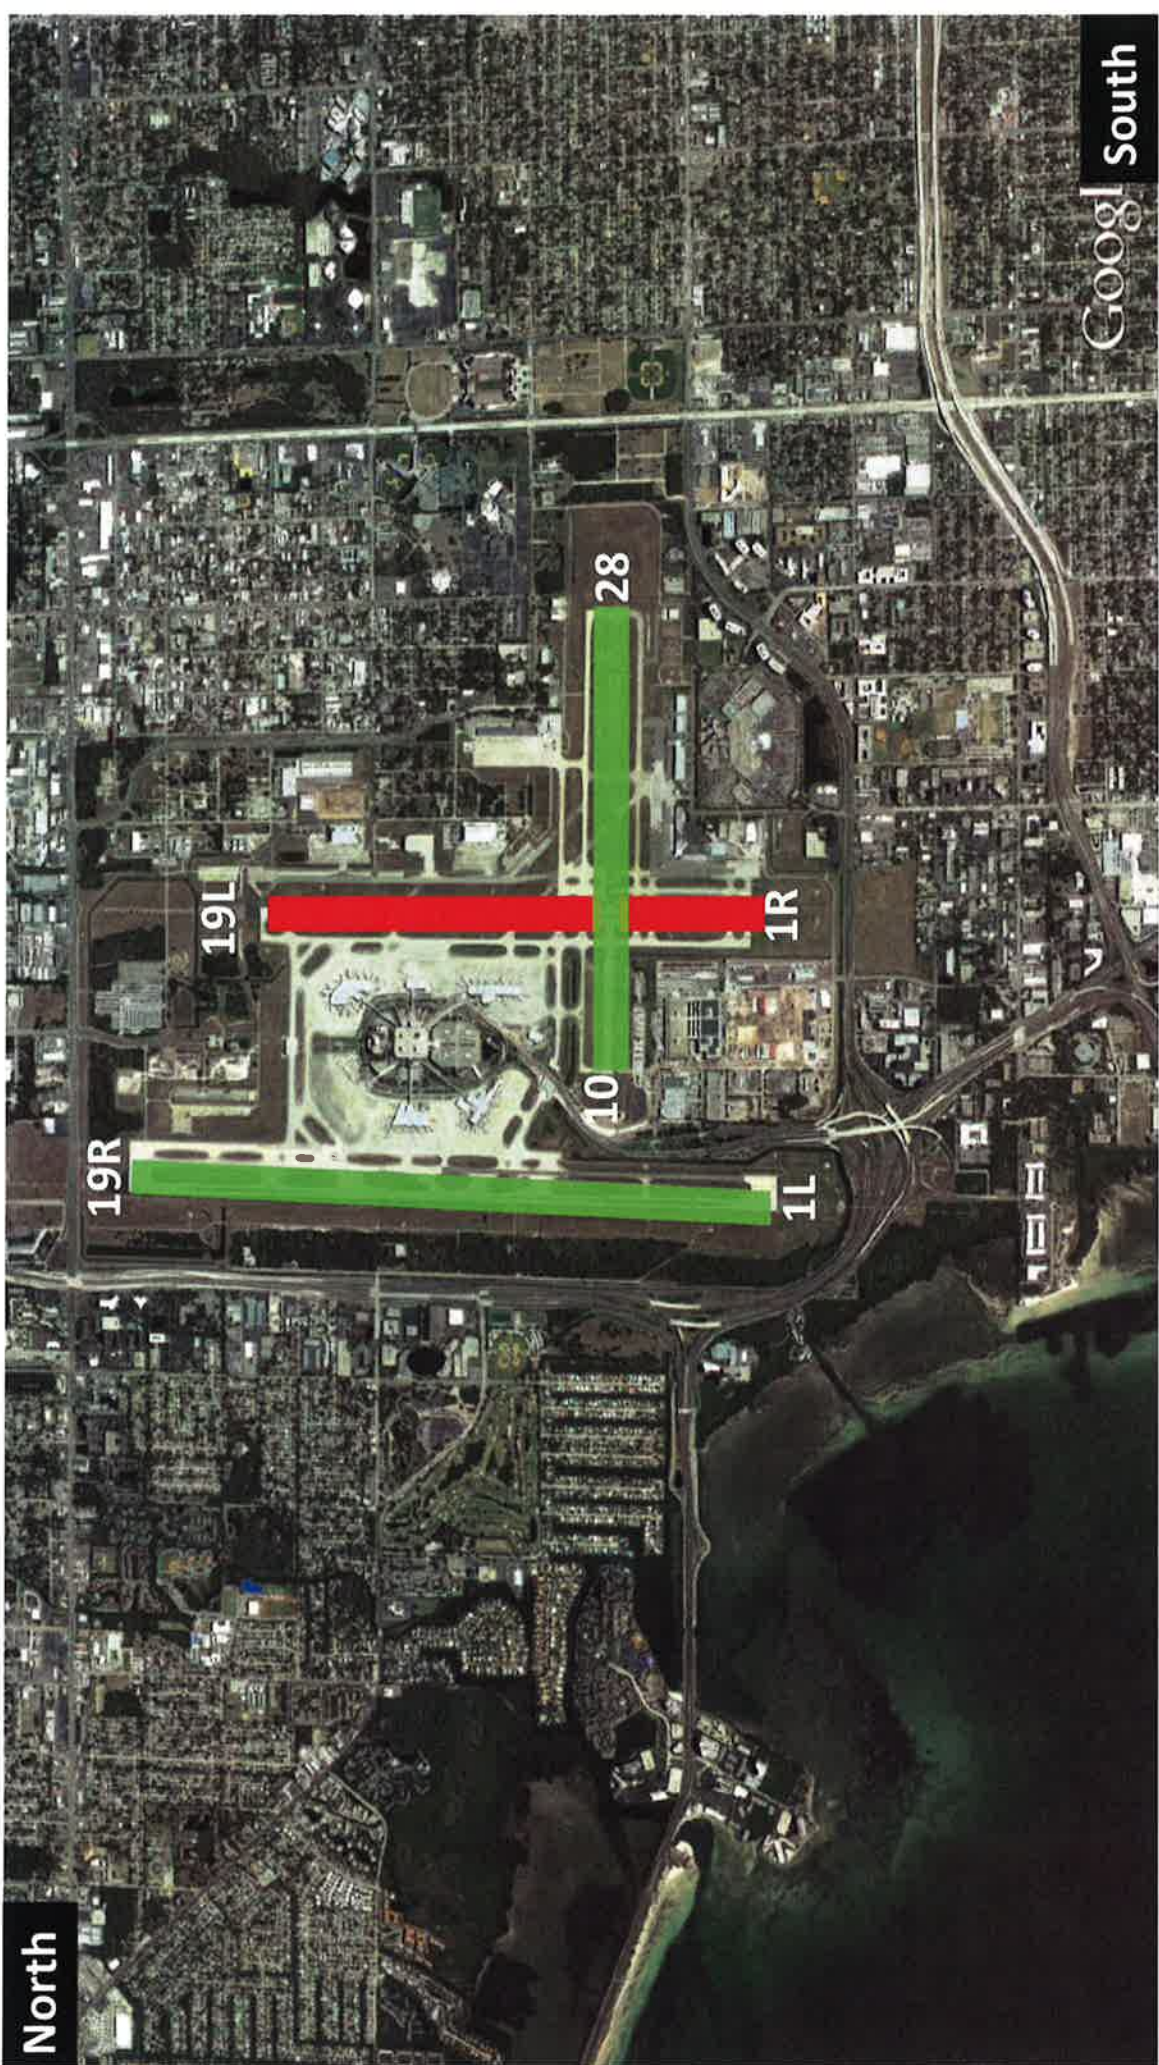

The work referenced above will be completed as quickly as possible over the dates outlined above. As always, weather conditions and other factors will contribute to how quickly this work can be completed.

Sincerely,

A handwritten signature in blue ink, appearing to read "Lloyd Tillmann".

Lloyd Tillmann
Director of Operations
