AMENDMENT NO. 1

TO

CONTRACT FOR DESIGN PROFESSIONAL SERVICES

This AMENDMENT No. 1 is to the Contract for Design Professional Services which was entered into the 3rd day of August, 2023 by and between the Hillsborough County Aviation Authority, a public body corporate under the laws of the State of Florida, hereinafter referred to as the "Owner", and Hensel Phelps Construction Co., a Colorado Corporation, authorized to do business in the State of Florida, hereinafter referred to as the "Design-Builder". With the execution of Amendment No. 1, the Owner and the Design-Builder, for the consideration stated herein, and other good and valuable consideration, hereto agree to change provisions of the aforementioned Contract as follows:

1. ARTICLE 3 – SERVICES BY THE DESIGN PROFESSIONAL

Delete Paragraph 3.1 in its entirety and replace with the following:

- 3.1 The services that the Design-Builder will provide to the Owner under this Contract will be in accordance with Section 287.055, Florida Statues, and will be in general accordance with the Owner's Request for Qualifications dated October 12, 2022, entitled "Request for Qualifications for Airside D Development Program at Tampa International Airport," which is incorporated by reference herein, the Design-Builder's fee and scope proposal dated July 25, 2023, entitled "Airside D Development Program & Westside Checked Baggage Screening System Relocation and Upgrades Authority Project Nos. 8500 23 & 8515 24," as amended by this Amendment No. 1 which is incorporated by reference herein, all work orders and will include all things necessary to design and support the Project (collectively Services) and the Design-Builder's fee and scope proposal dated August 22, 2024, entitled 8500 23 Airside D - Request for Change Order - Revision 3, which is attached hereto as Attachment 1 and incorporated herein by reference. In the event of any conflicts between this Contract and any other documents, the precedence in resolving such conflicts will be as follows:
 - 3.1.1 This Contract
 - 3.1.2 Individual work order and the Design-Builder's associated Fee and Scope Proposal
 - 3.1.3 The Owner's Request for Qualifications
 - 3.1.4 Relevant portions of the Design-Builder's response to Request for Qualifications

2. ATTACHMENT 1 – FEE AND SCOPE PROPOSAL

Delete Clarifications and Assumptions (Page 6 of 123 through 50 of 123) of the Design-Builder's fee and scope proposal dated July 25, 2023, entitled "Airside D Development Program & Westside Checked Baggage Screening System Relocation and Upgrades Authority Project Nos. 8500 23 & 8515 24" and replace with the attached revised Clarifications and Assumptions dated August 26, 2024, included in Attachment 1, Exhibit F.

3. ARTICLE 6 – PAYMENTS AND BASIS OF COMPENSATION

Delete Paragraph 6.1.2 in its entirety and replace with the following:

- 6.1.2 The amount for the performance of Basic Services, Additional Services, and Reimbursable Expenses required under this Contract and will be in a not to exceed amount of Seventy Eight Million One Hundred Forty Four Thousand Two Hundred Eighty Six (\$78,144,286), which includes all fees for Designers, subconsultants, subcontractors, and suppliers.
- 4. ARTICLE 25 DISADVANTAGED BUSINESS ENTERPRISE (DBE) ASSURANCES

Delete Paragraph 25.4 in its entirety and replace with the following:

- DBE Goals. In compliance with the Owner's DBE policy, the Design-Builder's minimum DBE commitment is established as the sum total of the verified Letter(s) of Intent submitted with their response. The goal stated below is the sum total of the certified DBE's listed in the Design-Builder's Fee and Scope Proposal which is attached hereto as Attachment 1 and which will be enforceable under the terms of this Contract. The Design-Builder will demonstrate that they will subcontract to certified DBEs certified by the Florida Unified Certification Program (FLUCP) at least 19.7% of the dollar amount of the design fees earned under this Contract, or clearly demonstrate in a manner acceptable to the Owner its good faith efforts to obtain certified DBE Designer, subconsultant, subcontractor or supplier.
- 5. All other consistent terms remain in full force and effect and are hereby ratified and confirmed.
- 6. The Contract, as modified by this Amendment No. 1, represents the entire understanding between the parties on the issues contained in the Contract, either written or oral, and may be amended only by written instrument signed by both parties.

Mr. Matt Deloatche HCAA - Tampa International Airport 4160 George J. Bean Parkway Tampa, Florida 33622

Subject: 8500 23 Airside D – Request for Change Order – Revision 3

Request for Change Order (PCO #0012)

Program Cost Reduction Evaluation and Revised Basis of Design – Revision 3

Dear Mr. Deloatche,

This letter shall serve as Hensel Phelps' Request for Change Order for the requested program cost reduction evaluation and revised basis of design for the Airside D program. On April 23rd, 2024, the Hillsborough County Aviation Authority (HCAA) directed the Hensel Phelps team to not proceed with the 30% design and develop a solution to reduce the cost of the program – "Exhibit A." The Hensel Phelps team proceeded to pivot its significant project resources to develop alternatives to the original Basis of Design (BOD) over the course of the following seven weeks and on June 14, 2024, received direction from HCAA to proceed with developing the "Nevada Concept" into a revised BOD – "Exhibit B." As noted in the minutes of the weekly administrative meetings between HCAA and Hensel Phelps, the delivery date for the revised BOD was agreed to occur on August 13th, 2024, to allow the HNTB design team adequate time for development, quality control, and submission.

Pursuant to article 6.3.1 of the Part 1 Contract, Hensel Phelps is requesting additional compensation for the scope of work requested by HCAA in Exhibits A and B. Hensel Phelps completed the work prescribed in the Contract for the "PDD Validation Phase," including the Validation Report and the Basis of Design (15% Design) – "Exhibit E". As noted above in Exhibits A and B, HCAA requested that Hensel Phelps change the design parameters associated with the previously completed PDD Validation Phase and complete a new Basis of Design deliverable in its place. "Exhibit F" represents the changed design parameters and these pages should replace the corresponding pages of the Part 1 Contract.

To provide a composite change order request herein, the Hensel Phelps and HNTB design/build team have developed a consolidated cost proposal made up of a proposal from Hensel Phelps (inclusive of Beck, Fronza & Francis, and Corporate Environmental Risk Management Corporation – "Exhibit C") and a proposal from HNTB (inclusive of each of the design sub-consultants – "Exhibit D"). The cost proposals are broken down into two categories, as discussed between Hensel Phelps and HCAA, as follows:

- 1. Work hours incurred between April 23 and July 26.
- 2. Work hours projected between July 27 and August 13.

A summary of the overall change order request is noted below:

| Firm | 1 - Program Cost Reduction Evaluation Actuals (4/23 - 7/26) | 2 – Program Cost Reduction Evaluation Projected (7/27 - 8/13) | Total |
|---------------|---|---|-----------------|
| Hensel Phelps | \$ 929,876.00 | \$ 286,606.00 | \$ 1,216,482.00 |
| HNTB | \$ 2,222,907.00 | \$ 555,351.00 | \$ 2,778,258.00 |
| Total: | \$ 3,152,783.00 | \$ 841,957.00 | \$ 3,994,740.00 |

Hensel Phelps hereby requests a Change Order in the amount of \$3,994,740.

Should you have any questions, please do not hesitate to contact me at 561.317.3434.

Sincerely,

Andrew Erbrick

Preconstruction Manager

Joe,

With the basis of design and cost estimate that was submitted to the Authority on April 18th, we are requesting that the HP Team not proceed with the 30% design until alternatives are provided and evaluated to reduce the cost of the program.

Let me know if you have any questions.

Thank you

Jeff Siddle, P.E. / Tampa International Airport / Vice President of Planning and Development

Subject: [EXT] 8500 23 Airside D - Nevada Concept NTP

[External Email]

Joe,

On 4/23/24, the Authority provided the direction to not proceed with the 30% design. We requested that the Design Build Team pause further development of the BoD concept, and instead, evaluate cost-saving, design alternates (an additional service). As a result of those studies, an alternate building design known as the "Nevada Concept" (officially delivered on 6/14/24) became the Authority's preferred direction for the future of the Airside D program. HCAA has since provided the verbal direction to Hensel Phelps to proceed with developing the Nevada Concept into a revised Basis Of Design; please consider this email as your written NTP, confirming that verbal direction.

Additionally, and as discussed in our 6/17/24 Admin Meeting, we need HP / HNTB to produce a formal proposal for the add services requested. This proposal needs to consist of:

- 1) A full accounting of the labor utilized from 4/23 to 6/14 in the evaluation of the cost-savings alternates. Note that other work on the program was performed during this period, so it will be important to clearly identify only labor for this scope.
- 2) A Scope, Schedule and Fee for the development of the revised Basis of Design.

You mentioned it may take up to a month for your team to generate this proposal. Please provide a target date that we can anticipate your formal submission.

Thank you for the team's hard work to date, and looking forward to more creativity to come!

Matthew W. DeLoatche, RA \mid Tampa International Airport \mid Sr. Manager of Planning + Design \mid C: 813-215-9066

Tampa International Airport Airside D Terminal - 8500 23 ASD Program Cost Reduction Evaluation and Revised Basis of Design

August 16, 2024 – v4

RE: Program Cost Reduction Evaluation and Revised Basis of Design Scope and Fee Proposal

General Scope of Work:

Hensel Phelps (HP) and HNTB submitted the Basis of Design for the Airside D Program on April 18, 2024. On April 23, 2024 HCAA directed HP and HNTB to stop work on further design development (30% schematic design) and to develop alternatives to reduce the cost of the Program for evaluation. HNTB and our subconsultant partners performed this evaluation as further detailed below until June 10, 2024 when HCAA directed HP and HNTB to continue with design based on the "Nevada Concept". Due to the significant changes to the original proposed design concept of Airside D, HP and HNTB recommended revision and resubmission of the Basis of Design prior to advancing the selected concept to 30% Schematic Design. As requested by HCAA, HNTB has prepared this Scope and Fee proposal that addresses the estimate of actual cost for the Program Cost Reduction, the actual costs to date of the Basis of Design update, and a forward-priced estimate to complete the Basis of Design update.

Scope and Clarifications:

The following scope items are required to complete the Program Cost Reduction Evaluation and Revised Basis of Design

- Identification of potential cost reduction alternatives.
- Categorization and initial assessment of potential cost reduction alternatives including potential cost impacts and impacts on Program goals.
- Meeting with HCAA for initial cost reduction evaluation on April 30, 2024.
- Cost Reduction Strategy Workshop in Kansas City, MO on May 7, 2024.
- Cost Reduction Strategy (FIS re-stack) Executive Meeting Presentation on May 10, 2024.
- Development and evaluation of primary cost reduction strategies including:
 - o Relocation of FIS to apron level (level 1)
 - o Relocation of clubs and lounges to level 3 (mezzanine)
 - o Reducing the number of levels and stacking of the terminal
- Design Presentation and selection of the "Nevada Scheme" for Cost Reduction Pricing on May 21, 2024
- Steering Committee Presentation for the "Nevada Scheme" refinement on June 7, 2024

- "Nevada Scheme" Pricing Presentation on June 14, 2024
- Design development of the selected "Nevada Scheme" including massing and roof options for inclusion in the Basis of Design
- Basis of Design Report Revisions for the "Nevada Scheme".
- Basis of Design Report Quality Control and Assurance

Exclusions:

- Work items not specifically described above.
- Design or development of concepts other than the "Nevada Scheme".

Schedule:

The Program Cost Reduction evaluation was performed from April 24, 2024 through June 10, 2024.

The Design Evolution for the "Nevada Scheme" and Basis of Design revisions will be performed from June 11, 2024 (following NTP from HCAA) through August 13, 2024.

The Revised Basis of Design will be submitted for review on August 13, 2024.

The scope included in this proposal has impacted the overall design schedule. The revised design schedule will be submitted for approval as part of a separate schedule proposal.

Disciplines Involved:

| Discipline/Firm | Scope (For North Site unless otherwise noted) |
|-----------------|--|
| HNTB – | Alternatives development and evaluation; Basis of Design updates for Nevada |
| Architecture | Scheme |
| HNTB – | Evaluation of impacts on building foundation/structure; Basis of Design updates for |
| Structures | Nevada Scheme |
| HNTB – Civil | Evaluation of impacts on Apron and other civil works; Basis of Design updates for |
| | Nevada Scheme |
| Gensler | Alternatives development and evaluation; Basis of Design updates for Nevada |
| | Scheme |
| TLC | Evaluation of impacts on mechanical, plumbing, and technology requirements for |
| | terminal building; Basis of Design updates for Nevada Scheme |
| Vic Thompson | Coordinate domestic out-bound baggage make-up layouts and program space |
| Company (VTC) | requirements. Coordinate international (FIS) in-bound baggage make-up layouts |
| | and distribution to the FIS baggage claim, and right size baggage carousel frontage. |

Proposed Fee

This scope of work includes a Design Fee Proposal in the amount of \$2,778,258 to complete the design services. This fee estimate is summarized below and detailed in Exhibits A-D.

This includes the estimate of actual costs to perform the technical assessment and evaluations of program cost reduction alternatives, design evolution, and Basis of Design Updates from April 24, 2024 through July 26, 2024. These costs are summarized in Exhibit B.

The estimate of cost to complete development of the "Nevada Scheme" and the update of the Basis of Design is summarized in Exhibit C.

The design team will monitor the fee and notify the owner in advance if the allocated fee is anticipated to exceed the amount indicated herein. See attached documents for more detailed description of scope and fee.

| Design Firm | Program Cost Reduction Evaluation and Basis of Design Updates Estimate of Actual Costs 4/23-7/26/24 | BOD Updates Estimate to Complete 7/26-8/13/24 | Reimbursables | Total |
|-------------|---|---|---------------|-----------------|
| HNTB | \$ 1,247,014.78 | \$ 314,897.14 | \$ 49,110.00 | \$ 1,611,021.92 |
| Gensler | \$ 731,214.80 | \$ 148,618.44 | \$ 11,134.00 | \$ 890,967.25 |
| TLC | \$ 209,665.53 | \$ 31,591.79 | \$ - | \$ 241,257.31 |
| VTC | \$ 35,011.99 | - | \$ - | \$ 35,011.99 |
| Total | \$ 2,222,907.10 | \$ 495,107.37 | \$ 60,244.00 | \$ 2,778,258.47 |

EXHIBIT "E"

The PDD Validation Phase will include two components: Validation Report and Basis of Design (15% Design)

1. PDD Validation Report

Prepare a Validation Report that analyzes the Project Definition Document (PDD) provided by the Authority (authored by Ricondo, dated September 2022). Our team will validate the following sections:

- a. Introduction
- b. Program Overview
- c. Activity Forecast: Passenger Simulations
- d. Site Development
- e. Building Concepts
- f. Facility Space Program
- g. Design Criteria

Prepare a Validation Report that validates the design presented to the Authority on March 8, 2023, during the HCAA Interview including:

- a. Building Form
- b. Roof Form
- c. Line of Sight
- d. Gatehouses
- e. Floorplans (Levels 1-4)
- f. Shuttle Guideway connection
- g. SSCP location
- h. Level 3 FIS layout (understanding that the CBP's Bags First layout is not preferred)
- i. Level 4 Airline Club and Outdoor deck
- j. Cost Estimate
- k. Schedule

2. Basis of Design

Develop the Basis of Design documents (15% design) that will be responsive to the discovery elements outline in the validation process. The Basis of Design will establish the design parameters for the following phases and identify key milestones moving forward. The following drawings will be included:

- a. Civil/Site Plans
- b. Architectural Plans
- c. Structural Plans
- d. Mechanical Plans
- e. Electrical Plans
- f. Technology/Special Systems Plan

Enabling Package

Develop the design package as it relates to the enabling scope necessary to commence work on the project site including the following components:

1. Office Complex inclusive of all necessary utilities

7/20/2023

Clarifications & Assumptions

1. Project Schedule

- a. The project schedule included in our RFQ response was the basis for this estimate.
- b. Some of the key design milestones for submission to the Owner are below:
 - i. Enabling Design submitted on 8/13/24 2/1/24 with comments back within 2 weeks
 - ii. Schematic Design (30%) submitted on 11/14/24 2/29/24 with comments back within 2 weeks
 - iii. Design Development (60%) submitted on 4/3/25 7/29/24 with comments back within 2 weeks
 - iv. Construction Documents (90%) submitted on 7/17/25 11/5/24 with comments back within 2 weeks.
 - v. Construction Documents (100%) submitted on 9/25/25 1/21/25 with comments back within 2 weeks
 - vi. Invitation to Bid (ITB) Documents (90%) submitted on 2/27/25 11/6/24 with comments back within 2 weeks
 - vii. Invitation to Bid (ITB) Documents (100%) submitted on 3/5/25 2/31/24 with comments back within 2 weeks

It is understood that the design phase will consist of numerous package and milestone in effort to meet the demand of the Owner and the Design-Builder's schedule. Listed below are the anticipated delivery packages. The precise timeline of deliverables is to be coordinated with the Design-Builder.

- Enabling Package
- 2. Early Works Package
- Airside D Core and Shell Package
- 4. Airside D Interior Building Package
- 5. Airside D FFE / Signage Wayfinding
- 6. Existing Terminal and Airsides Reconfigurations
- 7. ASD Base Building APM System/Infrastructure
- 8. Westside Checked Baggage Screening System Including BHS improvement to Terminal E and F
- 9. Invitation to Bid #1 (ITB-1) Apron Paving Hydrant Fueling
- 10. Invitation to Bid #2 (ITB-2) Existing Apron Demolition
- 11. Invitation to Bid #3 (ITB-3) Sitework / Utilities
- 12. Invitation to Bid #4 (ITB-4) PBB Design
- 13. Invitation to Bid #5 (ITB-5) Shuttle Guideway Structure

The Design-Builder may try and consolidate the 5 ITB packages to create efficiencies.

2. Basis of Design

- a. The fee is was originally based on progressing the RFQ Response Concept demonstrated in the Approach and the Presentation/Interview, but has been updated as the Basis of Design has been revised herein. Estimate updates, including variance report from prior phase estimates and assistance with grant requests. This will include assistance on applicable invitation to bid components. The fee is not based on the PDD concept by Ricondo.
- b. The Design-Builder will validate the PDD data/content.
- c. Plans for the new FAA tower will be taken into consideration when performing the shadow study for sight lines.

3. Preconstruction Management

 a. Preconstruction staffing is projected through 9/25/25 3/31/25. The General Conditions for any remaining procurement and all of the Part 2 General Conditions will be included in the Enabling GMP.

4. DBE Commitment

a. The goal for DBE % remains at 16% for the complete program (not independent to each HCAA job number).

5. Design team Collaboration Plan

a. The design team will work at the respective offices and collaborate in person and virtually as needed. This plan is as indicated on the attached HNTB and Gensler Collaboration plans.

6. Night Work

- a. Limited night work is included associated with the investigation and studies phase. This night work will be used to ensure that this phase of work minimizes impacts to airport operations, the traveling public, the FAA and the hotel.
- 7. The scope provided for Building Information Modeling (BIM) and Virtual Design and Construction (VDC) is outlined as follows:
 - a. Project startup / General
 - i. Attend jobsite walks and project meetings as the BIM/VDC subject matter experts.
 - ii. Assign BIM/VDC Managers who will oversee and meet the requirements of the Authority.
 - iii. Assist in capturing and managing existing condition documentation through 360-degree photographs.
 - iv. Create a Design BIM/VDC Execution Plan and establish a QA/QC strategy and a 3D/ BIM expectations timeline to align with the design schedule.
 - v. Set up the project for 2D, 3D & BIM coordination and 4D scheduling.
 - vi. BIM/VDC Managers will initiate, administer, and maintain a cloud-based Autodesk Construction Cloud collaboration site.
 - vii. BIM/VDC Managers will plan and conduct a BIM Kick-Off meeting with all design contributors.
 - b. Design Development Construction Documentation

- i. Conduct BIM Model Audits at major milestones, providing architectural peer reviews from a modeling and annotation perspective.
- ii. Generate issue reports and conduct BIM Coordination meetings.
- iii. Support the resolution of issues through sketches and model options, promoting design optimization.
- iv. Conduct Navisworks model clash coordination review sessions, enhancing coordination and communication.
- v. Manage any additional BIM consultants required for supplementary work.
- vi. A final detailed fly-through animation depicting the look and feel of the project will be performed once at the end of the design period. Simpler, but realistic renderings, in progress Revit fly-through depictions will be utilized through the design process to communicate the design intent to team members and the owner.
- vii. Support constructability reviews

c. Preconstruction

- i. Update the BIM/VDC Execution Plan to align with the construction goals.
- ii. Collaborate with the Scheduling and Preconstruction teams to produce constructability animations.
- iii. Create comprehensive BIM Bid documentation and provide support in the prequalification and planning stages.
- iv. Attend bid interviews as needed, contribute to Level BIM Bids, and offer budget friendly suggestions.
- v. Coordinate with Design Manager and Preconstruction team to support budget evaluation tracking and facilitate the purchasing process for optimized project costs.

d. Scanning and Modeling

- i. Scanning and point cloud creation for BHS at Main terminal, ASE & ASF.
- ii. Scanning and point cloud creation for the baggage claim areas ceilings at the Main terminal. This will be coordinated with the Owner's design-builder. Design-Builder has included 4 mobilizations for this and will perform the scans after the baggage claim Design Builder removes the ceilings.
- iii. Develop and manage architectural and structural existing condition modeling.
- iv. Existing conditions mechanical, electrical, plumbing, fire protection and baggage handling systems modeling.
- v. Coordinate with the subsurface utility exploration (SUE) building information model (BIM) scope consultant.

e. Exclusions

- i. CA to be included in the Part 2 Contract as VDC staff members.
- ii. Irrigation systems will not be included in the model, refer to BIM/VDC Execution Plan for details.

8. Project Accounting

a. Although the fee is organized based on the 3 project scopes within the Airside D project (Project No. 8500 23), this fee can be moved from scope to scope as needed if it does not exceed the contract cap.

- b. Although the fee is organized based on the 30%, 60%, 90% and 100% design deliverables, this fee can be moved from deliverable to deliverable as needed if it does not exceed the contract cap as long as they remain within in their respective Project No.
- c. Should the Part 1 fee not be entirely used, any remaining funds may be moved to the applicable Part 2 Contract if approved by the Owner.
- 9. From a bidding/procurement perspective, the Design-Builder plans to put the 90% documents out to bid to the subcontractor community. During the bid period, the Design-Builder plans to complete the 100% documents and issue these documents via addendum during the bid period so that the subcontractors bids reflect the 100% documents. Should this process be schedule prohibitive, Design-Builder will include coverage in the GMP to account for the scope of the 100% documents. The baggage handling trade partner is planned to be procured earlier than the 90% document development.
- 10. Renderings and 1 fly through animation are included and will be developed and provided on a quarterly basis over an 18-month period (6 times). The renderings will be no more than 6 locations per quarter. Renderings will be completed at each phase to provide clarity on the design and assist in decision making with the design.
- 11. Project Meetings among the design team, contractor and Owner are included in the scope of work. Schedule of meeting will be conducted based need and level of effort at that time. The following regular meetings are anticipated.
 - a. 2 meetings per week with the Owner with agendas developed based on the need at the time.
 - b. 1 meeting with the Owner's Executives each month.
 - c. Design deliverable review meetings to conduct "over the shoulder" reviews.

Additional meetings such as stakeholder meetings, specific design topic meetings, etc. over the course of the design and preconstruction period to facilitate communication amongst the Owner and our entire team will be needed.

- 12. It is the Design-Builder's understanding that entitlements and property records are maintained and managed in good standing by the Owner to allow for the project development.
- 13. The following peer reviews are included
 - a. MEP/IT review to be performed by Hensel Phelps Services as we prepare each deliverable for the Owner's review.
 - b. "Follow the Water" review to be performed by a third party to review all envelope systems and details.
 - c. Within the QC process individuals will be named from HNTB and Gensler that are outside of our project team to be part of the review process and will be involved in the preparation of each deliverable for the Owner's review.
- 14. The Design-Builder understands that the Owner has created a Steering Committee and retained Subject Matter Experts (SMEs). As explained by the Owner, these entities will be part of the normal design, preconstruction and review process and will not add additional time and effort to the design process and schedule. The Steering Committee and the SME's will be included in our process, but it is critical that the design schedule, as included in the RFQ response, is met.
- 15. The Design-Builder understands that the Owner has engaged an external concession consultant (the Paslay Group) that the Design-Builder will work with during the design process.

16. Construction Administration (CA)

- a. In general, the CA scope includes the following items.
 - Bulletin development and coordination associated with bulletins required by Hensel Phelps. This does not include bulletins required for added or revised scope required by the Owner.
 - ii. Project visits/ Job walks and associated Field Reports
 - iii. Meetings and Coordination
 - iv. RFI processing
 - v. Submittal processing
- The Design-Builder has not carried any time associated with CA for any of the Invitation to Bid Packages. Only our designers have included time for their respective designs.
 Any CA to be performed by the Design-Builder can be added in the Part 2 Contract if desired.
- c. The Design-Builder has not included CA after substantial completion.
- d. The Design-Builder has not included the costs for a moisture consultant in the CA and will include this cost in the Part 2 Contract as part of the cost of work.
- 17. The Design-Builder has not included costs for the following items.
 - a. Permit fees as this will be included in Part 2.
 - b. Application fees, service fees, hookup fees
 - c. Physical scale models of the project.
 - d. Carbon footprint study for this project and its impact to the airport.
 - e. Threshold inspections as this will be included in Part 2
 - f. Construction management personnel associated with construction, including the Enabling work, are not included here, and will be included in the Part 2 Contract(s).
 - g. Airline tenant guidelines are included for Airside D but are not included for any other Airsides
 - h. Although underground utility evaluation and exploration is included, the Design-Builder has not included any camera survey of underground utilities and piping.
 - i. Replacing existing utility infrastructure in proximity of the site because of its poor condition.
 - j. For concrete pavement design, the Design-Builder has excluded all design related to pavement replacement due to damage or lack of maintenance by the Owner.
 - k. Gate analyses at Airsides A, C, E and F.
 - I. Design or preconstruction efforts related to relocation of the Aircraft Remain Over Night (RON) are not included as this will be performed by other projects.
 - m. The Design-Builder has not included design around unforeseen items that were left behind from the previous Airside D demolition that are not represented on the provided as-huilts
 - n. Studying the entire airport fuel pipeline/tank(s) capacity to serve Airside D. The Design-Builder has assumed the fuel capacity of the airport is adequate to serve Airside D.
 - o. Studying entire airport power capacity to accommodate this project (TECO responsibility). The Design-Builder will study the power capacity needs of Airside D.

- p. Studying entire airport for storm, sanitary, telecom and natural gas capacity. The Design-Builder will only do this as it pertains to Airside D.
- q. Although the Design-Builder is performing a geotechnical evaluation and a hazardous material survey/soil assessment, the Design-Builder has not included any additional testing or remediation associated with these findings.
- r. Analysis of HCAA, airline, existing or 3rd party specific equipment.
- s. New Environmental studies (EA, EIS, Cat-X, etc.) are not included (the Design-Builder will use the existing studies). The Design-Builder included the design for the necessary soil remediation.
- t. Additional raceways and structured cabling system for new tenants inside Airside D such as Airlines, Ground Handling Vendors or Concessions, outside the established provisions indicated in the Concessions Design Guideline.
- u. Raceways and structured cabling system for the specific use of the Automated People Mover and/or its operator.
- v. Design of active network/telecommunication equipment such as:
 - i. Network switches, routers and Firewalls for the Owner nor any other tenant
 - ii. VoIP phone system for the Authority or any other tenant.
 - iii. Courtesy phones in all areas
 - iv. Rack mounted UPS units for the Authority or any other tenants.
 - v. WAPS for Wi-Fi deployment in all areas.
 - vi. Common use equipment for all gates.
 - vii. Self-boarding equipment for gates or APM lobby.
- w. Airline specific PA systems for Operations offices, airline clubs, and ramp areas.
- x. The Authority will procure the cameras/CCTV storage appliances, AV, displays and LED videowalls required for all applications. Our team will design to those selected cameras/CCTV storage appliances, AV, displays and LED videowalls.
- y. Content creation for changing/expanding the dynamic signage system and electric directories.
- z. Access control, CCTV systems or Alarm systems for the specific use of a tenant such as Airlines, Ground Handlers, or Concessions.
- aa. Wireless Duress Systems for the checkpoint. Typically, TSA has a nation-wide contract to install and support these systems at all checkpoints.
- bb. Checkpoint screening equipment specifying and selection (will be coordinated and approved by the TSA).
- cc. Inbound baggage handling system (inbound baggage will be tugged back to the Main Terminal, similar to other Airsides).
- dd. Laser Imaging Detection and Ranging (LIDAR) sensors and analytics for queue management and collection of data at checkpoints will not be provided beyond the design of the structured cabling system infrastructure required for those system as well as the coordination of the installation of these components with all other architectural components. Sensors, servers, software, and applications is expected to be provided by the Authority.

- ee. Rooftop Antenna farms for the Airlines or Tenants (such as CBP). It is understood that they install their own radios for operations. The specifications and procurement of radio equipment is by others.
- ff. No scope is included for designing the DAS system for cell phones, beyond the coordination with the current vendor (Crown Castle) for the expansion of the existing system to the new Airside.
- gg. The APM system design will be by others
- hh. The following scope areas are not included in this proposal and may be provided by the Lighting Designer as additional services if requested:
 - i. Lighting or daylighting design mitigation for adverse wildlife impact
 - ii. Retail areas and stores
 - iii. Art lighting
- ii. New roadway signage support structures.
- jj. No exterior landscape design is included. We have only included seed and sod replacement as needed (including modifications to existing irrigation systems as necessary).
- II. Redevelop/update the DDFS or other basic program information found in the PDD.
- mm. Geotechnical and/or structural engineering study and mitigation design for sinkholes or karsts is not included in the Phase 1 or construction phase fee proposal. If sinkholes or karsts are discovered, fees to provide further testing, exploration, recommendations, and design would be in addition to the fees presented in this proposal and would be considered per each specific discovery.
- nn. The Design-Builder has not included the design of new fueling systems, power or telecom other than those at Airsides D .
- oo. Airsides A, C, E, and F gates concourse level mechanical, lighting, full holdroom refresh, fire protection, fire alarm, FF&E, Wayfinding.

18. Sustainability

- a. This estimate is based on the design and construction achieving LEED Silver certification. The fees to certify are not included.
- b. LEED Silver Certification is only for Airside D
- 19. White Paper Studies the following white paper studies are included in our design fees. This does not take away from our base scope design obligations. These are additional studies to evaluate other design possibilities. Should the Authority elect to include one or more of these items in the program, additional design services and fees for these options will be required.
 - a. A study for the use of a solar power on the roof
 - b. A study of a new CUP at Airside D compared to using the new MTCE CUP
 - c. A wind tunnel study as noted under the Structural section.
 - d. A study on additional resiliency for the airside, including hardened building, elevated generators, switch gear & main electrical rooms elevated, electrical redundancy, and full electrical backup.
 - e. A study on the use of electrochromatic glass.

20. Civil

a. The Site is ready for the development/construction of this project, and the Design-Builder has assumed that there are no requirements for a Master Use Permit or Conditional Use Permit.

21. Architectural

- a. General Artwork design included in the form of a \$100,000 allowance. The Design-Builder has included some coordination with the Owner regarding Artwork as follows:
 - Identify opportunities for artwork, including plan identifying potential artwork locations. This can be shared with the Owner's art consultant and selected artists.
 - ii. Meet with Owner's art consultant up to four times to understand shared vision for art.
 - iii. Provide plans and white model renderings to Owner's art consultant to support effort.
 - iv. Provide coordination efforts for construction and installation of artwork.
 - v. The Design-Builder has not included any detailed design associated with specific Artwork.
- b. FF&E design is included except for specifying tenant/stakeholder/airline Computers, Servers, Monitors and equipment selection, including common use check-in kiosks. We have also not included design for furniture and equipment for airline tenants.
- c. Design-Builder will develop a unique carpet specification and pattern
- d. The maintenance area for the APM will be in the Airside D building as noted in the PDD. The footprint may be smaller if it serves the purpose intended. We have included the design scope based on this maintenance area being like the Airside C APM maintenance area.
- e. Signage and wayfinding ...
 - Design-Builder is responsible for the overall campus wayfinding to accommodate the new Airside D and the overall airline relocations. This includes the following areas
 - 1. Baggage claim
 - 2. Ticketing level
 - 3. Existing Airsides
 - Roadways (this does not include any new roadway signage support structures)
 - ii. Design-Builder will utilize the 2021 Wayfinding Standards Manual

22. Structural

- 23. APM Guideway and System
 - a. Alstom will be involved in the design process and their input included in a timely manner so there is no redesign based on their late feedback.
- 24. The fire protection design is scope is based on a delegated design performed by the fire protection trade partner.

- 25. Tenant and Concessions Spaces In general, Design-Builder will assume a grey box with the code required minimums for retail/food and beverage spaces. A grey box is defined as an unfinished space with unfinished floors, bare stud walls, no plumbing or electrical work (beyond what is required for a code compliance such as minimum lighting, fire protection, etc.)
 - a. Airline spaces Design-Builder to provide design for the complete fit-out of the space.
 - b. Retail/food and beverage concessions and support spaces Design-Builder to provide design for a code compliant shell space for these areas and lease outline documents. Infrastructure necessary to support the space such as plumbing and electrical is included and will be brought to a demarcation point. Beyond the demarcation point, the Owner's designers / contractors will further develop the space.
 - c. TSA and U.S. CBP spaces Design-Builder to provide design for the complete fit-out of the space.
 - d. HCAA Operations spaces Design-Builder to provide design for the complete fit-out of the space.
 - e. Airline club/lounge spaces There will be 2 club/lounge spaces Design-Builder to provide design for the shell space with drawings for leasing including main utility design. Design-Builder will develop standards and guidelines for the tenant's designer and will coordinate with the club/lounge space designer.
 - f. Design-Builder will be responsible for move management of tenants.
- 26. Concessions Development of Concession guidelines and coordination of shell and core infrastructure related to tenant spaces is included. Any work associated with any and all Tenant Improvements specific to a tenant or multiple tenants is excluded.
- 27. Airline Relocations
 - a. Develop up to two finish palettes for Back of House(BOH) tenant spaces for tenant selection or implement Airline Tenant standard finishes.
 - b. Field verify existing Airline Tenant spaces to develop inventory of existing furniture and equipment to be relocated.
 - c. Assumed a "like for like" design based on the airlines existing spaces.
- 28. Westside Checked Baggage Handling System
 - a. It is understood that OTA funding support is not available for this project and therefore has not been included in our scope.
 - b. Design-Builder has included design for new space/structure at Airsides E & F
 - c. Design-Builder has included scanning and point cloud creation for BHS at Main terminal, ASE & ASF.
- 29. "Design Evolution" per coordination between the Design-Builder and the Owner may continue to the delivery of the 60% Construction Documents. Follow the comment resolution of the 60% submittals, additional studies and revisions may be considered additional services.
- 30. Utilization of Authority Program Management Control System (PMCA), Kahua.
 - a. HCAA will utliize the web-enabled project management system Kahua for this contract.
 - b. Kahua is accessible through the internet and the Design-Builder will use the system as prescribed by the Owner.
 - c. Processes and training will be provided for all team members.
 - d. License will be provided to the Design-Builder's staff for proper utilization.

Introduction: The scope of work is comprised of 5 projects as follows.

Project: Airside D Development Program

Project No.: 8500 23

This Project is for a new 16 gate Airside (AS D), apron, hydrant fueling system and guideway with shuttle connection to the Main Terminal Shuttle D Station.

The AS D Development Program is future defined with the following demarcations of work and project numbers:

- 8500 23 ASD Airside D (includes coordination with Alstom for the D Shuttle Station
- 8500 23 APN Apron and Site
- 8500 23 APM Vehicles and Control (Alstom and Lea & Elliott only)
- 8500 23 GDY Guideway (includes coordination with Alstom)

And

Project: Westside Checked Baggage Screening System Relocation and Upgrades

Project No.: 8515 24

This project will replace and upgrade the checked baggage screening systems for Airside E and F.

Project Scope: See below for a detailed project scope of each identified project.

HCAA Project: Airside D Building

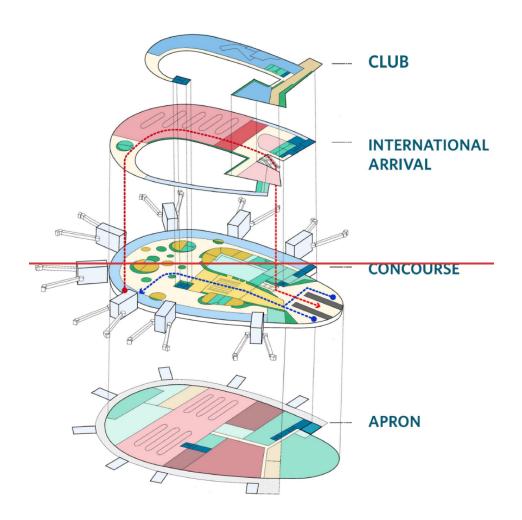

Project No. 8500 23 ASD

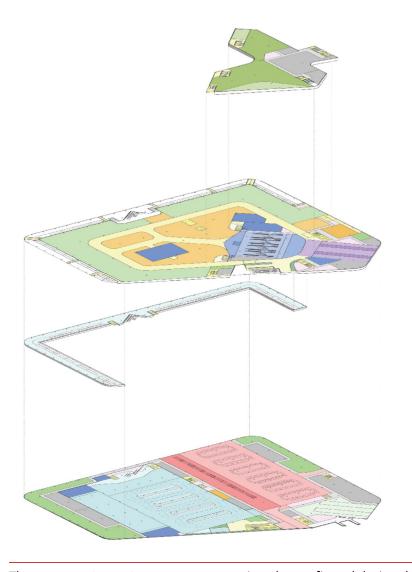

Scope of Work

The scope of this project includes the design and construction of a new 560600,000 SF Airside D with sixteen gates, shuttle station, Security Screening Checkpoint (SSCP), Federal Inspection Services (FIS) facility for international arrivals, Passenger Boarding Bridges, Concessions, and support spaces. Per The Authority, the following work elements are needed to complete the project and maintain customer service and functionality of TPA. This information is based on the PDD provided by Ricondo. The project assumes all international carriers and certain domestic airlines will relocate to Airside D.

- 1. Sixteen (16) Gate Airside Terminal Building:
 - a. Level 1: Ramp level with airline support, <u>outbound baggage make-up</u>, CBIS, shuttle maintenance Facility, restrooms, concessions support, bus station, mechanical and back of house spaces, <u>and the Federal Inspection Services (FIS) Facility.</u> <u>DB will incorporate Owner's request for a passenger first design, not bags first.</u>
 - b. Level 1.5: CBP FIS Sterile Corridor
 - b-c. Level 2: Boarding level with 16 passenger boarding bridges and swing gates, TSA Security Screening Checkpoint, shuttle station, hold rooms, circulation space, restrooms, concessions, mechanical and back of house spaces
 - c. Level 3: Federal Inspection Services (FIS) Facility, sterile corridor, circulation space, restrooms, mechanical and back of house spaces, airline clubs and common use clubs. DB will incorporate Owner's request for a passenger first design, not bags first.
 - d. Level 43: Airline Clubs and outdoor deck. Owner has requested that there be two clubs at approximately 13,000 sf each totaling 28,000 SF. Owner will have minimum standards for the club designs for DB to incorporate and refine as necessary. Final locations of the airline clubs and outdoor deck location are to be included in a study.
 - e. Concessions: The concessions are envisioned to be 2537,000 SF plus support areas. A portion of this will be centrally located outside the security checkpoint and may also be incorporated into hold room areas. Concessions will include food and beverage, retail, duty free, and other services.

LEVEL 3: MEZZANINE

LEVEL 2: CONCOURSE

LEVEL 1.5: STERILE CORRIDOR

LEVEL 1: APRON

LEVEL 0.5: WEST APRON

LEVEL 0.2: UTILITY

LEVEL 0: FIS

- The revised BOD RFQ response concept is to be confirmed during the PDD validation phase and further refined during the evolution of design (with adherence to the budget) with input and approval from the Owner.
- 3. Improvements in the Main Terminal Complex and Airsides due to airline relocation
 - a. Modifications to the Main Terminal Airside D shuttle station
 - b. Airline Relocation for Main Terminal Ticketing level and Baggage level for baggage service offices: Based on the most complex scenario for 8 air carriers ticketing counters and ATO spaces being realigned / moved
 - c. Airline Relocations for Airsides A, C, E, and F: Based on most complex scenario for 8 air carriers concourse level gate podiums and airline equipment, and apron level airline operation offices, and GSE.

4. Outbound Baggage Conveyor Handling System from the Main Terminal to Airside D. This includes necessary building envelope exterior / interior enclosures for the new baggage system, including modifications to the existing Redside drive aisle ceilings.

Design Services for this project will include:

- 1. Enabling Scope
 - a. AOA Fence relocation and Temporary AOA fencing and vehicle gates
 - b. Construction office trailer complex and associated storage and parking
 - c. Temporary utilities for construction complex
 - d. Permitting for trailers and utilities
 - e. Construction Safety and Phasing Plan: 7460's regarding airport height zoning permit
 - f. Apron demolition
- 2. Terminal planning
- 3. Gate planning
- 4. Architectural design for exterior building
- 5. Architectural design for interior building
- 6. Passenger security screening planning and design
- 7. Checked baggage inspection system planning and design
- 8. Customs and Border Protection planning and design
- 9. Passenger boarding bridges (PBB) design, including Visual Docking Guiding System (VDGS). Glass and traditional PBB's will be evaluated.
- 10. Baggage handling system design
- 11. Geotechnical engineering
- 12. Structural engineering
- 13. Civil engineering
 - a. Civil scope will include utilization of Owner provided environmental reports to establish necessary soil remediation design.
 - b. Perform a shadow study to evaluate the existing and new tower to confirm acceptable sight lines.
 - c. In accordance with the fleet mix indicated in the PDD, evaluate fleet mix and all Ground Service Equipment (GSE) associated with 100% gate occupancy.
- 14. Mechanical engineering
 - a. Evaluate/design the use of common chases associated with MEP for concessions spaces
- 15. Electrical engineering
- 16. Plumbing engineering
- 17. Fire protection system engineering

8/26/2024

- 18. Baggage handling system design
- 19. Interior & Exterior Signage design, including roadway signage (utilizing existing roadway structures)
- 20. Interior design including FFE and interior plants and planter systems
- 21. Acoustical design
- 22. LEED/Resilient/Sustainable design
- 23. Airline relocation and logistics management, including all logistics, phasing plans and move matrices
- 24. Security access control/CCTV design
- 25. Telephone, data wiring, wireless networks, Electronic Video Information Displays (EVIDS) and other systems necessary for the complete operational needs of an active airside. Coordination with existing airport systems is included. A complete OFE IT matrix will be developed and maintained. The costs for all Information Technology Services (including OFE) will be incorporated into the Design Builder's estimate.
- 26. Power stations and infrastructure for electric GSE equipment
- 27. Public address system
- 28. Art coordination and general infrastructure
- 29. Presentations & Visualization in Owner acceptable format (presentations, finish boards, etc.)
- 30. APM Control Room (reference Owner L&E documents to determine requirements)
- 31. Concessions Design Guidelines
- 32. Concessions Shell space (minimum standards as set forth by Florida Building Code), including all applicable infrastructure necessary for tie in by Owner's concession contractors
- 33. Meeting Minutes

Preconstruction Services for this project will include:

- 1. Review of the Master Plan
- 2. Manage the Site Survey process
- 3. Outreach events and communication with potential subcontractors
- 4. Estimating, including cost variance reports between deliverables.
- 5. Bid Package Development
- 6. Purchasing of subcontractors and vendors
- 7. Scheduling
- 8. Constructability Reviews
- 9. Development of Safety and Quality Control Plans
- 10. VDC/BIM management and coordination
- 11. Communication/Status Updates/Meetings with the Authority
- 12. Internal and External Coordination
- 13. Quality Control reviews of design deliverables
- 14. Prepare for construction, mobilization, planning, etc.

PDD Validation Phase

The PDD Validation Phase will include two components: Validation Report and Basis of Design (15% Design)

1. PDD Validation Report

Prepare a Validation Report that analyzes the Project Definition Document (PDD) provided by the Authority (authored by Ricondo, dated September 2022). Our team will validate the following sections:

- a. Introduction
- b. Program Overview
- c. Activity Forecast: Passenger Simulations
- d. Site Development
- e. Building Concepts
- f. Facility Space Program
- g. Design Criteria

Prepare a Validation Report that validates the design presented to the Authority on March 8, 2023, during the HCAA Interview including:

- a. Building Form
- b. Roof Form
- c. Line of Sight
- d. Gatehouses
- e. Floorplans (Levels 1-4)
- f. Shuttle Guideway connection
- g. SSCP location
- h. Level 3 FIS layout (understanding that the CBP's Bags First layout is not preferred)
- i. Level 4 Airline Club and Outdoor deck
- j. Cost Estimate
- k. Schedule

2. Basis of Design

Develop the Basis of Design documents (15% design) that will be responsive to the discovery elements outline in the validation process. The Basis of Design will establish the design parameters for the following phases and identify key milestones moving forward. The following drawings will be included:

- a. Civil/Site Plans
- b. Architectural Plans
- c. Structural Plans
- d. Mechanical Plans
- e. Electrical Plans
- f. Technology/Special Systems Plan

Enabling Package

Develop the design package as it relates to the enabling scope necessary to commence work on the project site including the following components:

1. Office Complex inclusive of all necessary utilities

2. Temporary AOA Fencing to capture the project site as "landside"

Schematic Design Phase - 30%

The 30% design will include Design Build Team studies for evaluation by HCAA to select a single alternative to move forward into the next design phases. This will include:

- 1. Exterior Building Form
- 2. Roof Form
- 3. Shuttle Station
- 4. SSCP Layout
- 5. FIS Facility Layout
- 6. Concessions
- 7. Main Terminal Airline Relocation Layout, inclusive of considerations to other airsides (A,C, E & F) operations.
- 8. Baggage Handling System

The best solutions will be selected during 30% design.

Other 30% design and preconstruction tasks include:

- 1. Meetings and meeting minutes
- 2. Design schedule development
- 3. PowerPoint Design presentations
- 4. Stakeholder questionnaires, and meetings
- 5. Data collection (site surveys, site observation walks, LiDAR, GPR, circuit tracing, utility capacity testing, and other)
- 6. Existing conditions 2-D drawings, some BIM model information, and data collection
- 7. Budget verification
- 8. Set up project cost estimate, including variance reports from previous deliverable
- 9. Develop project accounting procedures
- 10. Develop solicitation list for subcontractors and vendors
- 11. Outreach events to educate the community
- 12. Develop the project schedule
- 13. Develop the project safety plan and the project quality control plan
- 14. Develop the scope for the Enabling work and associated bid packages
- 15. Develop criteria compliance log
- 16. Develop design action log
- 17. 30% Demolition drawings
- 18. 30% Architectural design
- 19. 30% Structural design
- 20. 30% MEP and FP design
- 21. 30% Electrical design

- 22. 30% IT/low voltage design
- 23. Outline specifications
- 24. QA/QC reports

Foundation Design Package

Develop the design package as it relates to the foundation package including the following components:

- 1. Structural Foundation Package inclusive of deep foundations as necessary
- 2. Architecture column grid plans and footprint
- 3. Slab plan and below grade waterproofing (as required)
- 4. Coordinate with Consultants regarding utilities around footprint and foundations.

Design Development Phase - 60%

- 1. Meetings and meeting minutes
- 2. PowerPoint Design presentations
- 3. Design schedule maintenance
- 4. Estimate updates including variance report from previous deliverable
- 5. Outreach events to educate the community
- 6. Finalize solicitation list for subcontractors and vendors
- 7. Develop prequalification packages for subcontractors and vendors
- 8. Develop bid packages
- 9. Maintain and expand the project schedule
- 10. Maintain and expand the project safety plan
- 11. Maintain and expand the project quality control plan
- 12. Maintain criteria compliance log
- 13. Maintain design action log
- 14. 60% demolition drawings
- 15. 60% Architectural design (for replacement spaces in the main terminal if required)
- 16. 60% Structural design
- 17. 60% MEP and FP design
- 18. 60% Electrical design
- 19. 60% IT/low voltage design
- 20. 60% MOT phasing plans
- 21. 60% Drainage design
- 22. 60% New / relocated utilities design
- 23. 60% Specifications
- 24. QA/QC reports

Construction Documents Phase - 90%

- 1. Meetings and meeting minutes
- 2. PowerPoint Design presentations
- 3. Design schedule maintenance
- 4. Estimate updates, including variance report from prior phase estimates and assistance with grant requests. This will include assistance on applicable invitation to bid components.
- 5. Prebid meetings
- 6. Out to bid on packages
- 7. Maintain and expand the project schedule
- 8. Maintain and expand the project safety plan
- 9. Maintain and expand the project quality control plan
- 10. Maintain criteria compliance log
- 11. Maintain design action log
- 12. 90% demolition drawings
- 13. 90% Architectural design
- 14. 90% Structural design
- 15. 90% MEP and FP design
- 16. 90% Electrical design
- 17. 90% IT/low voltage design, including development and updating of the OFE IT Matrix identifying all systems and responsibilities of the furnishing & installation, quantities and budget.
- 18. 90% MOT Phasing plans
- 19. 90% Drainage design
- 20. 90% New / relocated utilities design
- 21. 90% Specifications
- 22. QA/QC reports

Construction Document Phase - 100%

- 1. Meetings and meeting minutes
- 2. Design schedule maintenance
- 3. 100% demolition drawings
- 4. 100% Architectural design
- 5. 100% Structural design
- 6. 100% MEP and FP design
- 7. 100% Electrical design
- 8. 100% IT/low voltage design, including development and updating of the OFE IT Matrix identifying all systems and responsibilities of the furnishing & installation, quantities and budget.
- 9. 100% MOT Phasing Plans
- 10. 100% Drainage design
- 11. 100% New / relocated utilities design
- 12. 100% Specifications
- 13. QA/QC reports

Construction Administration Phase

- Attend weekly construction meetings (includes weekly CA meeting, OAC meeting, MEP Coordination meeting)
- 2. Visit project site at appropriate intervals and complete observation reports of construction progress
- 3. Interpret contract documents
- 4. Review and respond to RFIs
- 5. Review and process submittals, including shop drawings, product data or samples
- 6. Review, evaluate and update contract documents
- 7. Prepare Construction Bulletins
- 8. Assist Builder in final acceptance reviews
- 9. Assist Builder in closeout of the construction contract
- 10. Create Observation Reports
- 11. Complete record drawings

HCAA Project: Airside D Elevated Guideway

Project No. 8500 23 GDY

Scope of Work

The scope of this project includes the design and construction of the new Airside D Elevated Guideway Automated People Mover (APM) from the Main Terminal to the new 560,000 SF Airside D terminal. Per The Authority, the following work elements are needed to complete the project and maintain customer service and functionality of TPA. This information is based on the PDD provided by Ricondo. The project assumes all international carriers and certain domestic airlines will relocate to Airside D.

1. APM Guideway

- a. Foundations
- b. Vertical Piers
- c. Horizontal Structure
- d. Connection from the Main Terminal Airside D Shuttle Station
- e. Baggage handling system outbound conveyor pathway and utilities coordination (with enclosure)
- f. Guideway Utilities Electrical
- g. Guideway Egress Pathway
- h. Guideway Lighting

Design Services for this project will include:

- 1. Vehicular VISSIM simulations and analysis
- 2. Architectural design coordination
- 3. Structural Design
- 4. Architectural lighting coordination
- 5. Electrical engineering coordination
- 6. Systems design coordination
- 7. BHS design coordination
- 8. Egress coordination
- 9. Civil Design
- 10. Design Scheduling

Preconstruction Services for this project will include:

- 1. Review of the Project Definition Document (PDD)
- 2. Manage the Site Survey process
- 3. Coordination with HCAA Outreach events to educate the community as necessary
- 4. Estimating, including cost variance reports from previous deliverable
- 5. Scheduling
- 6. Constructability Reviews
- 7. Development of Safety and Quality Control Plans
- 8. VDC/BIM management and coordination
- 9. Communication/Status Updates/Meetings with the Authority
- 10. Internal and External Coordination
- 11. Quality Control reviews of design deliverables
- 12. Prepare for construction, mobilization, planning, etc.

PDD Validation Phase

The PDD Validation Phase will include two components: Validation Report and Basis of Design (15% Design)

1. PDD Validation Report

Prepare a Validation Report that analyzes the Project Definition Document (PDD) provided by the Authority (authored by Ricondo, dated September 2022). Our team will validate the following sections:

- a. Activity Forecast: Passenger Simulations
- b. Design Criteria

Prepare a Validation Report that validates the design presented to The Authority on March 8, 2023, during the HCAA Interview including:

a. APM Structure

2. Basis of Design

Develop the Basis of Design documents (15% design) that will be responsive to the discovery elements outline in the validation process. The Basis of Design will establish the design parameters for the following phases and identify key milestone moving forward. The following drawings will be included:

- a. APM Civil/Site Plans
- b. Structural Plans

Schematic Design Phase - 30%

30% design and preconstruction tasks include:

- Meetings
- Meeting minutes
- Design schedule development
- PPT presentations
- Renderings
- BIM Revit model set up
- Evaluate operations, traffic patterns, calendar of events etc. to better schedule this work
- Stakeholder questionnaires and meetings
- Data collection (site surveys, site observation walks, LiDAR)
- Existing conditions BIM model and data collection
- Budget verification
- Set up project cost estimate
- Develop project accounting procedures
- Coordination with HCAA Outreach events to educate the community as necessary
- Develop the project schedule
- Develop the scope for the enabling work and associated bid packages

- Develop criteria compliance log
- Develop design action log
- 30% Architectural design
- 30% Structural Consulting and performance specifications
- 30% FP design
- 30% electrical design

- 7. Prepare Construction Bulletins
- 8. Assist Builder in final acceptance reviews
- 9. Assist Builder in closeout of the construction contract
- 10. Create Observation Reports
- 11. Complete record drawings

HCAA Project: Airside D Base Building APM System Infrastructure & Coordination with Alstom

Project No. 8500 23 APM

Scope of Work

The scope of this project includes the design and construction of the new Airside D Base Building Automated People Mover (APM) Systems Infrastructure, along with coordination with the system provider Alstom. The APM System features approximately 800 feet dual lane guideway structure (see 8500 23 GDY) and a new Airside D passenger station (see 8500 23 ASD). The basis for the scope incorporates the documents provided by the Owner as follows:

- Reference Drawings for Airside D Program Automated People Mover as prepared by Lea & Elliott dated March 31, 2023
- Airside D Program Automated People Mover Performance Based Technical Provisions as prepared by Lea & Elliott dated March 31, 2023
- Detailed Pricing Forms dated March 31, 2023 (referenced by Owner as 50. Airside D Pricing Forms-Final-3-31-23).

The project assumes all international carriers and certain domestic airlines will relocate to Airside D.

Although the scope is defined separately here, from an invoicing standpoint, this work will be invoiced as follows.

- The APM scope that occurs within the Airside D shuttle station will be invoiced to project 8500 23 ASD.
- 2) The APM scope that occurs on the guideway and outside of the Airside D shuttle station footprint will be invoiced to project 8500 23 GDY.

Design Services for this project will include:

- Surveying
- 2. Subsurface utility investigations
- 3. Geotechnical engineering
- 4. LiDAR scanning
- 5. Demolition design
- 6. Architectural design
- 7. Architectural lighting design
- 8. Structural (building) engineering
- 9. Civil engineering
- 10. Utilities engineering
- 11. Mechanical engineering
- 12. Electrical engineering
- 13. Sustainability design
- 14. Fire protection system engineering
- 15. Plumbing engineering
- 16. Signage design
- 17. Interior design
- 18. IT / Low Voltage systems design
- 19. Security access control/CCTV design
- 20. Telephone, data wiring and wireless networks
- 21. Design Scheduling

Preconstruction Services for this project will include:

- 1. Review of the Project Definition Document
- 2. Manage the Site Survey process
- 3. Outreach events and communication with potential subcontractors
- 4. Estimating, including cost variance report from prior phase estimates and assistance with grant requests. This will include assistance on applicable invitation to bid components.
- 5. Bid Package Development
- 6. Purchasing of subcontractors and vendors
- 7. Scheduling
- 8. Constructability Reviews
- 9. Development of Safety and Quality Control Plans
- 10. VDC/BIM management and coordination
- 11. Communication/Status Updates/Meetings with the Authority
- 12. Internal and External Coordination
- 13. Quality Control reviews of design deliverables
- 14. Prepare for construction, mobilization, planning, etc.

Schematic Design Phase - 30%

30% design and preconstruction tasks include:

- Meetings and meeting minutes
- Design schedule development
- PowerPoint presentations
- Renderings
- BIM Revit model set up
- Development of Program Requirements based upon stakeholder and airport input
- 30% Basis of design report
- Stakeholder questionnaires, surveys and meetings
- Data collection (site surveys, site observation walks, LiDAR, GPR, circuit tracing, utility capacity testing, and other)
- Existing conditions BIM model and data collection
- Budget verification

8/26/2024

- Set up project cost estimate
- Develop project accounting procedures
- Develop solicitation list for subcontractors and vendors
- Outreach events to educate the community

HCAA Project: Airside D Apron & Site

Project No. 8500 23 APN

Scope of Work

The scope of this project includes the design and construction of the Airside D Apron & Site area around the new 560,000 SF Airside D terminal. Per the Authority, the following work elements are needed to complete the project and maintain customer service and functionality of TPA. This information is based on the PDD provided by Ricondo. The project assumes all international carriers and certain domestic airlines will relocate to Airside D.

Apron, Taxilanes and Hydrant Fueling System:

- 1. Pavement removal, sitework, utility relocation, and soil remediation
 - a. Subservice Utility Engineering: Field marks (e.g., pin flags, paint marks, wooden lathes, nails/discs etc.) showing the position of the designated and located utilities, and Test Hole Data Report (THDR)
 - b. Surveying: Topographic <u>Survey</u>, <u>Vertical and Horizontal Survey Control</u>, <u>Pavement Elevations and Drainage Structures</u>, and <u>T.I.N</u> (<u>Triangulated Irregular Network</u>)
 - c. Pavement Demolition: Demo Pavement, Demo Utilities, Construction Safety and Phasing Plan (7460's regarding airport height zoning permit)
 - d. Site development:
 - e. Utilities:
 - i. Master utility coordination
 - ii. Natural gas
 - iii. Potable water
 - iv. Fire suppression water and fire hydrants
 - v. Sanitary
 - vi. Grease interceptors
 - vii. Coordination with underground IT / telecom lines
 - viii. Coordination with underground building power
 - f. Storm Drainage
 - i. Update Drainage Master Plan
 - ii. Hydrologic and hydraulic modeling
 - iii. Roof Drainage
 - iv. Trench Drains
 - v. Oil Water Separators
 - vi. Conveyance Pipe
 - vii. Underdrains
 - viii. Inlet Sizing
 - ix. Stormwater Management/Stormwater Quality/Erosion Control/NPDES Permitting

- g. Master Site Grading
- h. Hazardous Material Survey/Soil Assessment
- 2. New Apron, Taxi lanes and Hydrant Fueling System
 - a. Airside Civil Design:
 - i. Apron Paving
 - ii. GSE Apron
 - iii. Aircraft Parking Layout (per PDD section 4.4.1)
 - iv. Vehicle Service Road (Head of stand and Tail of stand)
 - v. Perimeter Sidewalk/Curb, Grading
 - vi. Truck Court
 - vii. Bus Station / Drop off including the bus route
 - Structures: Fueling structures (aircraft rated), Storm drainage structures (aircraft rated),
 Bollards
 - c. AOA fencing design: Vehicle gate /guard shack at vehicle AOA entry.
 - d. Airside Electrical: Centerline Lights, Edge Lights, Conduit/Circuitry, Handhole/Ductbank, and Airfield Signage
 - e. Passenger Boarding Bridges: Foundations
 - f. Hydrant Fueling System:
 - viii. Mechanical: Fuel pipe, isolation valve vaults, HPVs, LPDs, hydrant pits.
 - ix. Structural: Isolation Valve Vaults.
 - x. Electrical: Emergency Fuel Shut Off (EFSO), Communications (fiber to Fuel Farm) and Power (from building) for Motor operated valves, Vault sump pumps, level float switches, Leak Detection System.

Design Services for this project will include:

- 1. Surveying
- 2. Subsurface utility investigations
- 3. Geotechnical engineering
- 4. GPR investigations
- 5. Demolition design
- 6. Roadway design
- 7. Structural engineering
- 8. Civil engineering
- 9. Utilities engineering
- 10. Electrical engineering
- 11. Sustainable design
- 12. Airfield Signage design
- 13. Fuel System design
- 14. Landscape design
- 15. Design Scheduling

Preconstruction Services for this project will include:

- 1. Review of the Project Definition Document (PDD)
- 2. Manage the Site Survey process
- 3. Estimating, including cost variance reports between deliverables
- 4. Bid Package Development
- 5. Purchasing of subcontractors and vendors
- 6. Scheduling
- 7. Constructability Reviews
- 8. Development of Safety and Quality Control Plans
- 9. VDC/BIM management and coordination
- 10. Communication/Status Updates/Meetings with the Authority
- 11. Internal and External Coordination
- 12. Quality Control reviews of design deliverables
- 13. Prepare for construction, mobilization, planning, etc.

Limits shown above are approximate – final limits to be determined through design progression

PDD Validation Phase

The PDD Validation Phase will include two components: Validation Report and Basis of Design (15% Design)

1. PDD Validation Report

Prepare a Validation Report that analyzes the Project Definition Document (PDD) provided by the Authority (authored by Ricondo, dated September 2022). Our team will validate the following sections:

- a. Introduction
- b. Program Overview
- c. Activity Forecast: Passenger Simulations
- d. Site Development
- e. Design Criteria

Prepare a Validation Report that validates the design presented to The Authority on March 8, 2023, during the HCAA Interview including:

- a. Airside site limits
- b. Aircraft layout plan
- c. Construction phasing and packaging
- d. Cost Estimate
- e. Schedule

2. Basis of Design

Develop the Basis of Design documents (15% design) that will be responsive to the discovery elements outline in the validation process. The Basis of Design will establish the design parameters for the following phases and identify key milestone moving forward. The following drawings will be included:

- a. Civil/Site Plans
 - i. Utilities
 - ii. Storm Drainage
 - iii. Grading
 - iv. Paving
 - v. Fencing
 - vi. Hydrant Fueling

Schematic Design Phase - 30%

The 30% design will include Design Build Team studies for evaluation by HCAA to select a single alternative to move forward into the next design phases. This will include:

- 1. Demo
- 2. Utilities

8/26/2024

- 3. Storm Drainage
- 4. Grading
- 5. Paving
- 6. Fencing
- 7. Hydrant Fueling

The best solutions will be selected during 30% design.

Other 30% design and preconstruction tasks include:

- 1. Meetings
- 2. Meeting minutes
- 3. Design schedule development
- 4. PPT presentations
- 5. Data collection (site surveys, site observation walks, LiDAR, GPR, circuit tracing, utility capacity evaluation, and other)
- 6. Existing conditions BIM model and data collection
- 7. Budget verification
- 8. Set up project cost estimate
- 9. Develop project accounting procedures
- 10. Participation in Outreach events presented by HCAA to educate the community
- 11. Develop the project schedule
- 12. Develop the project safety plan
- 13. Develop the project quality control plan
- 14. Develop the scope for the Enabling work and associated bid packages
- 15. Develop criteria compliance log
- 16. Develop design action log
- 17. 30% Civil design
- 18. 30% Drainage design
- 19. Existing subsurface utilities condition model
- 20. 30% New / relocated utilities design
- 21. 30% Landscaping design
- 22. 30% Specifications
- 23. QA/QC reports

Design Development Phase - 60%

- 1. Meetings
- 2. Meeting minutes
- 3. Design schedule maintenance
- 4. PPT presentations
- 5. Estimates, including variance report from prior phase estimates and assistance with grant

requests. This will include assistance on applicable invitation to bid components.

- 6. Participation in Outreach events presented by HCAA to educate the community
- 7. Maintain and expand the project schedule
- 8. Maintain criteria compliance log
- 9. Maintain design action log
- 10. 60% Civil design
- 11. 60% Drainage design
- 12. 60% New / relocated utilities design
- 13. 60% Landscaping design
- 14. 60% Specifications
- 15. QA/QC reports

Construction Documents Phase - 90%

- 1. Meetings
- 2. Meeting minutes
- 3. Design schedule maintenance
- 4. PPT presentations
- 5. Estimates, including variance report from prior phase estimates and assistance with grant requests. This will include assistance on applicable invitation to bid components.
- 6. Prebid meetings
- 7. Maintain and expand the project schedule
- 8. Maintain and expand the project safety plan
- 9. Maintain and expand the project quality control plan
- 10. Maintain criteria compliance log
- 11. Maintain design action log
- 12. 90% Civil design
- 13. 90% Drainage design
- 14. 90% New / relocated utilities design
- 15. 90% Landscaping design
- 16. 90% Specifications
- 17. QA/QC reports

Construction Documents Phase - 100%

- Meetings
- 2. Meeting minutes
- 3. Design schedule maintenance
- 4. BIM Revit model maintenance
- 5. 100% Civil design
- 6. 100% Drainage design

- 7. 100% New / relocated utilities design
- 8. 100% Landscaping design
- 9. 100% Specifications
- 10. QA/QC reports

Construction Administration Phase

- Attend weekly construction meetings (includes weekly CA meeting, OAC meeting, MEP Coordination meeting)
- 2. Visit project site at appropriate intervals and complete observation reports of construction progress
- 3. Interpret contract documents
- 4. Review and respond to RFIs
- 5. Review and process submittals, including shop drawings, product data or samples
- 6. Review, evaluate and update contract documents
- 7. Prepare Construction Bulletins
- 8. Assist Builder in final acceptance reviews
- 9. Assist Builder in closeout of the construction contract
- 10. Create Observation Reports
- 11. Complete record drawings

HCAA Project: Westside Checked Baggage Screening System

Project No. 8515 24

Scope of Work

The existing checked baggage screening systems at TPA is comprised of two separate systems, one for Airsides A and C (Eastside) and a separate system for Airsides E and F (Westside). The relocation and upgrades for the Eastside baggage screening system was completed in May 2023 under project 5991 14.

The Westside baggage screening system is the original in-line baggage screening system that was commissioned in 2005. The Transportation Security Administration (TSA) is conducting ongoing maintenance projects to keep the existing system in service.

These separate systems cause constraints on the Ticket Level because the airline ticket counters and their associated conveyors deliver bags to specific airsides based on the baggage system function, layout and location. Exhibit A shows the current ticket counter layout and airside connection based on the baggage system.

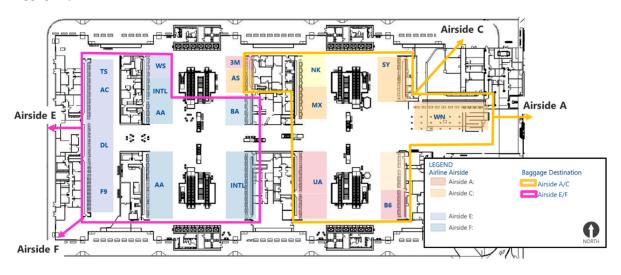

Exhibit A - Current Ticket Counter Layout

The baggage handling system for the Westside project will be designed in a way to replace the existing loop systems in the Main Terminal bag makeup area which will interconnect and provide the ability to deliver bags to any airside regardless of the Ticket Level check-in location, thereby, removing the constraint. In addition, future baggage check-in common use technology will also be accommodated with the new systems.

The existing Westside baggage screening system is comprised of a Checked Baggage Inspection System (CBIS) that has four screening loops, two for each airside, with each loop containing three L3 Explosive Detection System (EDS) devices. Checked Baggage Resolution Area (CBRA) areas are located within the existing CBIS spaces and a central On-Screen Resolution (OSR) room serves both the east and west baggage screening systems. The original westside baggage screening system was designed and installed

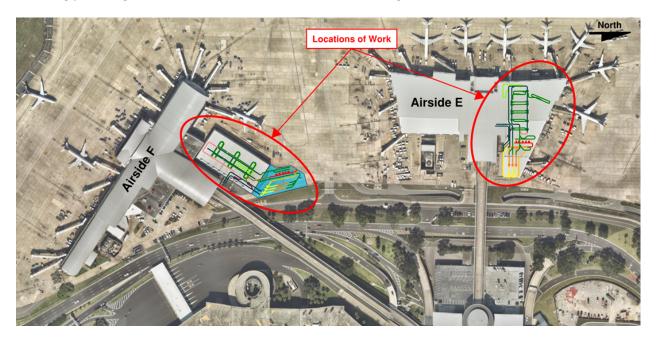

8/26/2024

prior to the issuance of any formal TSA Planning Guidelines and Design Standards (PGDS) and does not comply with current TSA system design criteria.

The project scope for Project No. 8515 24 includes the design of new checked baggage screening facilities for the Westside systems. It is anticipated the new systems will be located in the Main Terminal Bag Makeup Area or at Airsides E and F.

The Design-Builder will provide a study to determine the best location for the Westside systems. This assessment will also take into account the possibility of including the new Airside D Checked Baggage Screening Facilities in the Main Terminal Bag Makeup Area.

Once the study is approved by the Owner, the Design-Builder will provide all the necessary design as required by the TSA. The project is anticipated to include all architectural, civil, mechanical, electrical, technology, structural and BHS design to provide a complete system. The CBIS, CBRA and OSR room scope elements will be designed in accordance with TSA's PGDS Version 7.0, or current version at the time design commences. The project design will be delivered in accordance with TSA PGDS milestones including pre-design, schematic (15%), 30%, 70% and 100% design submittals.

Design Services for this project will include:

- 1. Surveying
- 2. Subsurface utility investigations
- 3. Geotechnical engineering
- 4. LiDAR scanning and GPR investigations
- 5. Demolition design
- 6. Architectural design

8/26/2024

- 7. Structural engineering
- 8. Civil engineering
- 9. Mechanical engineering
- 10. Electrical engineering
- 11. Plumbing engineering
- 12. Fire protection system engineering
- 13. Baggage handling system design
- 14. Signage design
- 15. Security access control/CCTV design
- 16. Telephone, data wiring and wireless networks
- 17. Public address system
- 18. Utilities engineering
- 19. Security access control/CCTV design
- 20. Telephone, data wiring and wireless network
- 21. Sustainability

Preconstruction Services for this project will include:

- 1. Review of the Project Definition Document (PDD)
- 2. Manage the Site Survey process
- 3. Outreach events and communication with potential subcontractors
- 4. Estimating, including cost variance report from previous deliverable
- 5. Bid Package Development
- 6. Scheduling
- 7. Constructability Reviews
- 8. Development of Safety and Quality Control Plans
- 9. VDC/BIM management and coordination
- 10. Communication/Status Updates/Meetings with the Authority
- 11. Internal and External Coordination
- 12. Quality Control reviews of design deliverables
- 13. Prepare for construction, mobilization, planning, etc.

Program Validation (TSA PGDS)

The Program Validation phase is to establish baseline criteria for baggage screening including programming validation, baggage demand analysis and determination of required equipment quantities to select a preferred alternative for further development.

- Meetings and meeting minutes
- Conduct a site survey
- Collect data (current and forecasted passenger/baggage demand, CBIS data, masterplan documents, base building backgrounds, etc.)

- Perform baggage demand analysis
- Determine BHS equipment counts
- Create BHS concept sketches
- Estimate preliminary BHS Rough Order of Magnitude (ROM)
- Develop Alternative Analysis Report (AAR)
- Perform Life Cycle Cost Analysis (LCCA)

Conceptual Design Phase - 15% (TSA PGDS only)

The Schematic Design – 15% phase is to further refine the preferred alternative selected in the previous phase and create a Basis of Design Report (BDR).

- Meetings and meeting minutes
- Develop 15% design level BHS concepts
- Refine preliminary BHS Range Of Magnitude
- Update baggage demand analysis
- Assist development of facility Cost Estimate (CWE) done by other discipline(s)
- Coordinate design efforts with TSA
- Submit Request for Variance (RFV) to TSA as needed
- TSA Schematic Design Package:
 - o CBIS/CBRA design drawings
 - Basis of Design Report (BDR)
 - Preliminary CBIS phasing plan
 - Cost Estimate CWE (BHS ROM) and LCCA
 - o EDS maintenance and environmental assessment
 - Stakeholder notification
 - Written response to TSA comments
 - Approved and in-process RFVs

Schematic Design Phase - 30%

The 30% design will include Design Build Team studies for evaluation by HCAA to select a single alternative to move forward into the next design phases.

30% design and preconstruction tasks include:

- Meetings and meeting minutes
- Design schedule development
- PowerPoint presentations
- 30% Basis of design report

- Stakeholder questionnaires, surveys and meetings
- Program requirements
- Data collection (site surveys, site observation walks, LiDAR, utility capacity testing, and other)
- Existing conditions and data collection
- Budget verification
- Set up project cost estimate
- Develop project accounting procedures
- Develop solicitation list for subcontractors and vendors
- Outreach events to educate the community
- Develop the project schedule
- Develop the project safety plan
- Develop the project quality control plan
- Develop the scope for the Enabling work and associated bid packages
- Develop criteria compliance log
- Develop design action log
- 30% Electrical design
- 30% IT/low voltage design
- 30% MOT Phasing plans
- 30% Civil design
- 30% Drainage design
- Existing subsurface utilities condition model
- 30% New / relocated utilities design
- TSA 30% Design Package:
 - CBIS/CBRA design drawings
 - Updated Basis of Design Report (BDR)
 - o Refined CBIS phasing plan
 - CWE (BHS ROM) and LCCA
 - Baggage and data flow charts
 - Conveyor manifest
 - Screening equipment installation guideline references
 - National Environmental Policy Act Form (NEPA)
 - Stakeholder notification
 - Written response to TSA comments
 - Approved and in-process RFVs
- QA/QC reports

Design Development Phase - 70%

- Meetings and meeting minutes
- Design schedule maintenance
- PowerPoint presentations

- Outreach events to educate the community
- Estimate updates, including variance report from prior phase estimates and assistance with grant requests. This will include assistance on applicable invitation to bid components.
- Finalize solicitation list for subcontractors and vendors
- Develop prequalification packages for subcontractors and vendors
- Develop bid packages
- Maintain and expand the project schedule
- Maintain and expand the project safety plan
- Maintain and expand the project quality control plan
- Maintain criteria compliance log
- Maintain design action log
- 70% Basis of design report
- 70% MEP and FP, electrical
- 70% IT/low voltage design
- 70% MOT phasing plans
- 70% Civil design
- 70% Drainage design
- 70% New / relocated utilities design
- TSA 70% Design Package:
 - CBIS/CBRA design drawings
 - Updated Basis of Design Report (BDR)
 - o Refined CBIS phasing plan
 - o CWE (BHS ROM) and LCCA
 - Preliminary contingency plan
 - o Preliminary site-specific configuration management plan
 - Stakeholder notification
 - o Written response to TSA comments
 - o Approved and in-process RFVs
- Specifications
- QA/QC reports

Construction Document Phase - 90%

- Meetings and Meeting minutes
- Design schedule maintenance
- PPT presentations
- Estimate updates, including variance report from prior phase estimates and assistance with grant requests. This will include assistance on applicable invitation to bid components.
- Prebid meetings
- Issuing bid packages to the trade partner community

- Maintain and expand the project schedule
- Maintain and expand the project safety plan
- Maintain and expand the project quality control plan
- Maintain criteria compliance log
- Maintain design action log
- 90% Electrical design
- 90% IT/low voltage design
- 90% MOT Phasing plans
- 90% Civil design
- 90% Drainage design
- 90% New / relocated utilities design
- 90% Specifications
- QA/QC reports

Construction Document Phase - 100%

- Meetings
- Meeting minutes
- Design schedule maintenance
- 100% Electrical design
- 100% IT/low voltage design
- 100% MOT Phasing Plans
- 100% Civil design
- 100% Drainage design
- 100% New / relocated utilities design
- 100% Specifications
- TSA 100% Design Package
- TSA 100% R1 Design Package
- QA/QC reports

Construction Administration Phase

- Attend weekly construction meetings (includes weekly CA meeting, OAC meeting, MEP Coordination meeting)
- 2. Visit project site at appropriate intervals and complete observation reports of construction progress
- 3. Interpret contract documents
- 4. Review and respond to RFIs
- 5. Review and process submittals, including shop drawings, product data or samples
- 6. Review, evaluate and update contract documents
- 7. Prepare Construction Bulletins
- 8. Assist Builder in final acceptance reviews
- 9. Assist Builder in closeout of the construction contract

- 10. Create Observation Reports
- 11. Complete record drawings

Affidavit of Compliance with Anti-Human Trafficking Laws

Airside D Development Program & Westside Checked Baggage Screening System Relocation and Upgrades

In accordance with section 787.06 (13), Florida Statutes, the undersigned, on behalf of the Hensel Phelps Construction Co., listed below ("Design-Builder"), hereby attests under penalty of perjury that:
